

## Wedding Photography Pricelist

Pricing has been kept very simple, you first opt for a digital photo only package which gives you a certain amount of time coverage on your day. Photos are edited and delivered to you on your own USB key to use / copy / print as you wish. If you wish you can add an album or other extras post wedding.

What's on the USB Key ? Philip believes in giving you unrestricted access to all your digital photos. All images are high resolution, can be copied, printed & are not watermarked, totally unrestricted access !

On the USB key are three folders:

- Folder one is all photos taken on your wedding day unedited.
- Folder two is the most important folder where Philip has picked out the best photos from your wedding day and fully edited these images (colour balanced, sharpened and lightly retouched any blemishes), these are all in colour.
- Folder three has the same images as folder two but all in black & white.

On a standard wedding day Philip will typically take 1100-1400 images (all in folder one) and from this will pick typically 350-400 images for the second folder which are the best photos from your day. This varies obviously on a shorter or longer day. Images in folders 2 and 3 are designed to be ready to print.

Any of the listed packages below can be customised for you as required, please contact Philip for any specific requirements you may have and we'd be delighted to customise a package for you.

Note all packages include your own web gallery (password protected) to share your photos with family and friends. The images from folder 2 on your USB key are uploaded to this gallery. Note only the bride and groom get the password for this gallery, ensuring privacy if you so wish.

All bar the first package also include a pre-wedding meeting which is typically done 2-3 weeks before your wedding to make plans for the day covering of shot lists, bad and good weather plans etc.
